Integral Geometry and Cohomology in Field Theory on the Space-Time as Complex Riemannian Manifold

Francisco Bulnes

IINAMEI, Research Department in Mathematics and Engineering, TESCHA, Chalco, Mexico

Retracted: Bulnes F. Integral Geometry and Cohomology in Field Theory on the Space-Time as Complex Riemannian Manifold [Internet]. Advances in Complex Analysis and Applications. IntechOpen; 2020. Available from: <https://dx.doi.org/10.5772/intechopen.92969>

Date of retraction: August 29th, 2023

The publisher is retracting the Chapter [1] following an internal investigation which revealed evidence pointing to a systematic manipulation of the publication process.

According to the findings made by IntechOpen's Research Integrity department, the process manipulation consisted of using fabricated non-institutional email addresses for reviewers suggested by the authors and whose identity could not be verified, as well as fabricated peer review reports whose authenticity and impartiality could not be confirmed by the publisher.

Due to the reasons outlined above, the publisher believes that the integrity and scientific validity of the Chapter's contents may be compromised and is therefore opting for a retraction of said publication.

The author does not agree with the retraction.

The publisher regrets any inconvenience this might have caused to the readership.
